背景

• 有一天..... 产品经理和设计师想搞个大新闻

技术分析

手势+动画

卡片: scale + translate

背景: opacity

标题: translate+opacity

技术分析

手势 +动画 卡片: scale + translate

技术分析——结论

一切效果 = 手势 + 动画

WEEX动画

```
var animation = require('@weex-module/animation');
var testEl = this.$el('test');
animation.transition(testEl, {
styles: {
  color: '#FF0000',
  transform: 'translate(1, 1)',
  transformOrigin: 'center center'
 duration: 0, //ms
 timingFunction: 'ease',
 delay: 0 //ms
}, function () {
 nativeLog('animation finished.')
```

动画DEMO

WEEX手势

长按 press

单击tap

拖拽pan

轻划swipe

WEEX手势

```
<template>
 <div onpanstart="handlepanstart"></div>
</template>
<script>
module.exports = {
methods: {
  handlepanstart: function(eventProperties) {
   // handling with the Event Properties
</script>
```

手势DEMO

但是.....

问题 Gesture Handler VDOM Compare JS OFF OOF Native Real Element Gesture

新方案——EXPRESSION BINDING

```
element.onPanGestureStart = function(event){
   event.createBinding(element, "transform.translate", "{x: x, y: y+10 }")
   event.createBinding(element, "opacity", " (abs(x) + abs(y)) / 100 ")
}
```

新方案——EXPRESSION BINDING
